AREAS OF EXPERTISE

Project Management

Web Application Design & Development

Full Stack Development

Microservices

Software Debugging

Data Structures & Algorithms

Agile Methodology

WORK EXPERIENCE

Sr. Software Engineer

OnGraph Technologies Pvt. Ltd, Noida

08/2021- Present

- Design, develop, test, and maintain high-quality software applications.
- Uses tools like Git and Docker in conjunction with developers such as Node JS, Next JS, and JavaScript to create, test, and implement scalable software solutions in accordance with agile techniques.
- Provide technical guidance and mentorship to junior developers.
- Take ownership of software development projects and deliver them within the specified timeline.
- Coordinate with project managers to prioritize tasks and allocate resources effectively.

Software Engineer

Imperial IT Pvt. Ltd, Noida

12/2021-07/2023

- Design, develop, test, and maintain high-quality software applications.
- Build app using Node JS and Puppeteer.js to scrap data from another website and store it to database.
- Build RESTful APIs that served data to our JavaScript front-end mobile apps.
- Contribute to the time and resource estimates to assist in planning of project.

Executive – Software Development

Qzia Consulting Pvt. Ltd., Delhi

02/2020 - 12/2021

- Develop and maintain 12+ web applications and services using Node JS, PHP, MySQL, MongoDB, jQuery, JavaScript, React JS
- Fixed bugs from existing websites and implemented enhancements that significantly improved web functionality and speed.
- Build RESTful APIs that served data to our JavaScript front-end and mobile apps.
- Worked on real-time chat app using NodeJS, Socket.io and MongoDB
- Built e-commerce website using code PHP, MySQL, Bootstrap, HTML, CSS
- Push Notifications for Web and mobile app using Firebase

TECHNICAL SKILLS

Node JS	JavaScript	PHP	MySQL	mongoDB	React JS	Firebase	AWS	GIT	ES6
Express JS	Koa JS	Socket IO	Next JS	Supabase	Docker	Electron JS	OOPs	Serverless	

MAJOR PROJECTS

ImVision (Digital Signage)

<https://imvision.se>

Imvision is a comprehensive Digital Signage solution encompassing Android TV and Desktop applications for displaying digital media on a range of platforms, including Android TVs and LED screens. Additionally, it offers a web-based control panel for remote management, providing seamless control over your media content.

Tools and Technologies:

- Next JS, Electron JS, Node JS, Socket IO, Firebase, MongoDB, Redis, Google Cloud Storage

Roles and Responsibilities:

- Team Size: 6
- Role: Senior Software Developer
- Developed and designed the schema of MongoDB database and flow of the project.
- Developed the REST and Socket APIs. Developed and maintained the frontend and backend of all the applications of project Android TV app, Web App, Database to ensure seamless user experience across multiple platforms.
- Responsible for writing automated unit and integration tests using Jest to ensure the quality and functionality of the code.

AI-Logistic

<https://www.ailogisticssolutions.com/>

AI-Logistic is a versatile application designed for GPS and waypoint tracking of various outlets, efficient asset tracking, validation, and activation photo documentation, streamlined distribution management, comprehensive availability monitoring, and insightful consumer activity analysis.

Tools and Technologies:

- React JS, Node JS, Firebase, MYSQL, Amazon S3

Roles and Responsibilities:

- Team Size: 3
- Role: Senior Software Developer
- Developed the database schema and project flow to provide effective data management and a seamless project development process.
- Developed and constantly maintained the web application's backend components, including the Backend API and the database, to ensure a consistent user experience across all platforms.
- Responsible for server maintenance to ensure the application's dependability and performance, ensuring that it runs smoothly and without interruptions.
- Using GitHub Actions, implemented automated deployment pipelines to optimize the deployment process and support continuous integration and delivery (CI/CD)

Halsogourmet

<https://halsogourmet.com/>

Halsogourmet is your gateway to mastering the art of preparing delicious and nutritious meals with ease and education. Explore the Halsogourmet app to embark on a culinary journey that teaches you the secrets of cooking wholesome, health-conscious dishes.

Tools and Technologies:

- React JS, Node JS, Firebase, MYSQL, Amazon S3, AWS

Roles and Responsibilities:

- Team Size: 3
- Role: Software Developer

- Designed a SQL database schema, improving its structure for optimal data storage and retrieval.
- Developed RESTful APIs with rigorous server configuration to provide robust performance and security.
- Managed server maintenance activities, relying on Nginx for improved server reliability and better load balancing.
- Utilized Node.js clustering techniques to fully use server resources, considerably improving application performance.

Panoptica

Panoptica is a SaaS application that allows any client to connect their MS 365 business central with the application for warehouse management system, in which we manage all inbound, outbound shipments, intra movement of shipments, inventory management, and flight management system, as well as a mobile application for flight drivers to track real-time shipment location.

Tools and Technologies:

- React JS, Node JS, Firebase, MYSQL, Microsoft 365 Business Central

Roles and Responsibilities:

- Team Size: 3
- Role: Software Developer
- Developed a well-structured schema for the SQL database while detailing the project's workflow.
- Built robust backend APIs and configure server settings to ensure optimal performance.
- Established OAuth-based connectivity to seamlessly exchange data with Microsoft 365 Business Central in real-time, enhancing data synchronization and accessibility.

Chatfy

Chatfy is shopify app used to inject AI-powered chatbot in ecommerce web applications.

Tools and Technologies:

- Remix JS, Node JS, Supabase, OpenAI

Roles and Responsibilities:

- Team Size: 3
- Role: Senior Software Developer
- Provide technical leadership within the team.
- Collaborate closely with other team members, including product managers, designers, and developers.

EDUCATION

Master of Business Administration (MBA), in Marketing

G.C.R.G. Group of institutions, Lucknow.

2018 - 2020

Bachelor of Technology (B. Tech), in Electrical Engineering

Babu Banarasi Das National Institute of Technology & Management, Lucknow (BBDNITM).

2014 – 2018

LANGUAGE

English, Hindi
