

Name: Ms. Shalini Thamdeo Bodhe

Mob No: +91 9022486376

Email : shalinibodhe06@gmail.com

Address: A/P Ekodi, Chandrapur-442908

CAREER OBJECTIVE

Being highly qualified Data Engineer with experience in the industry, I enjoy creative problem solving and getting exposure on multiple projects, and I would excel in the collaborative environment on which your company prides itself.

CAREER SUMMARY

- **Overall, 3+ years** of experience in different domains in the IT industry and mainly in Hadoop Ecosystem Development and **PySpark** and Cloud service (Amazon Web Services).
- Have experience writing data extraction logic in **pyspark**.
- Have Experience building optimized big data pipeline using Hdfs,Hive,Hbase,**PySpark** on Cloud Premises
- Have a hands-on experience on **Amazon web services** mainly S3, EC2, EMR, RDS, IAM,Glue,Lambda.
- Experience processing large amounts of structured and unstructured data including integrating data from multiple sources
- Perform tasks such as writing scripts, calling APIs, write SQL queries.
- Develop batch processing, integration solutions and process structured and Unstructured Data.
- Good experience on Spark Architecture including Spark-Core, Spark-Sql.
- Experience in using Hadoop distribution like AWS.
- Experience in using schedulers like oozie.
- Experience in working on file compression techniques as well as various file formats like ORC, Parquet, AVRO.
- Experience in transferring data from RDBMS to HDFS and Hive tables using Sqoop and Spark API's.
- Implemented proof of concept to transform streaming data using Apache Kafka and data orchestration tool like Apache Ni-Fi.
- Implemented proof of concept in Glue
- Experience in creating tables, partitioning, bucketing, loading in Hive.
- Gather and process raw data at scale and analyze processed data.
- Analytical mind and ability to learn, relearn concepts.

TECHNOLOGY PROFICIENCY

- **Platforms:** Windows, Linux
- **Programming language:** Python,SQL
- **Scripting Language:** Shell Script
- **Big Data Ecosystem:** HDFS, Sqoop, Hive, **Pyspark** , Pyspark-SQL, Snowflake,ETL
- **Distribution Package:** AWS
- **IDE:** PyCharm, Jupiter notebook
- **Cloud Technologies:** AWS (S3, EC2 ,EMR Cluster, RDS, IAM, Glue)
- **Relational database:** MySQL, Oracle
- **Another tools and technology:** Github.

ORGANIZATIONAL SCAN

- **Organization:** Infister Technology Pvt Ltd
- **Designation:** Data Engineer
- **Location:** Pune
- **Duration:** From June 2020 to Till Date.

WORK EXPERIENCE

Project #1: DATA MIGRATION AND ANALYTICS IN RETAIL Duration: Sept 2021 to May 2023

Role: Data Engineer

Outline:

The purpose of the project is to migrate the client's data from the source (AWS S3), Perform ETL and Data-Processing on the Databricks and push the data to storage (AWS S3). The data was used to feed different applications in the analytic division.

Environment: Pyspark,Pycharm,Databricks,Jupyter, PowerBI, S3

Roles & Responsibilities:

- Daily stand up meetings for tasks status discussions.
- Apply the technical knowledge in pyspark to solve the daily problem.
- Creating dataframes from different file formats.
- Design Complex Schemas for Data Frames.
- Gathering data from all the source for a client then ETL the data using Spark,Pandas,Spark Sql etc..
- Perform many transformations to clean the data as per the business requirement.
- Analyzed the SQL scripts and designed it by using spark SQL for Faster performance.
- Involved in working on Spark Sql Code for Faster Data Processing and Better Performance.
- Installing required libraries in the cluster based on task.
- Optimizing code performance by using various optimizations as required.
- Writing / storing the processed data to required destinations in various file formats.

Project #2 : ANALYTICS IN BANKING DOMAIN

Duration: Dec 2020 to Aug 2021

Role: Data Engineer

Outline:

The purpose of the project is to create data pipeline and automate the job, processing and perform ETL operations and push the data to S3 Bucket.

Environment: AWS S3, ECR, Python, Sagemaker, AWS Lambda, Steps Function.

Roles & Responsibilities:

- Attend daily Scrum calls and team meetings.
- Weekly call with client for their requirements and further enhancement.
- Create a Sagemaker notebook to process the data .
- Create a Step Function which will trigger the Sagemaker notebook .
- Create a lambda function which will trigger the Step Function.
- Create a Docker file, and Docker Image to get all the required libraries while processing.
- Build a proper pipeline for the data.
- step function, lambda, and process the data by using code.py and libraries which stored in docker image in ECR.
- Sagemkaer contain 3 files that is 1. Code.py, 2. Dockerfile, 3. Executer file, with these three files we create a ECRimage.
- Develop different AWS services, including API, RDS instance, and Lambda to build serverless applications
- Work with the teammates to understand and support them in importing data from source to S3by using AWS Sagemaker.

EDUCATIONAL QUALIFICATION

- Done B.Sc from University of GADCHIROLI in May, 2019.
- Done HSC from NAGPUR in July 2016.
- Done SSC from Maharashtra State Board, Nagpur in July 2014.

PERSONAL DETAILS

Date of Birth : JUNE 22nd 1999

Languages known : English, Hindi and Marathi

I hereby declare that the above Information given is true and correct to the best of my knowledge and belief.
