Resilient automation engineer at an environment-friendly organization where my five plus years of expertise as an automation engineer and my broad exposure to the same will be beneficial in delivering quality service to the organization.

WORK EXPERIENCE

Wipro Technologies

(July 09, 2018 - Present)

Senior Project Engineer

Client **Cisco** - develops, manufactures, and sells networking hardware, software, telecommunications equipment, and other high-technology services and products.

Tech Stack - Tableau, Python, MySQL, Rest API

- Designed and implemented 15+ visual dashboards using Tableau that saved USD 35K annually because of effort reduction.
- Provided technical assistance to the Cisco Employees on Linux and engineering applications.
- Analyzed and implemented end-to-end reporting automation for managers and leads to improve visibility.
- Leading a team of 4 members and guided them in developing solutions using Tableau and Chatbots using the BOTLITE framework.
- With the aid of process automation utilising Python scripting, deliverables for more than 15 automation requests in the project were planned, tracked, and managed.
- Managing existing automation in place and enhancing them for different requirements.
- Worked on the Tableau tool for preparing Daily Tableau Reports.
- Experienced in the design, development and implementation of complex solutions.
- Maintaining new requirements and creating new automation scripts to meet the requirement.
- Experienced in client interaction during requirements, design and handover stages also for complex solutions.

ChatBots:

- **GSTS Support Bot:** This BOT is developed for the GSTS Team, to help the Engineers resolve/ route cases faster thereby reducing the overall MTTR.
 - Developed Bot UI using BotLite Framework
 - Developed and Integrate Rest API with the Bot
 - Efficiently handled post production bug fixes
- **Escalation Bot:** For the sake of saving the Users' time, this ChatBot is used by Users to report an incident and to escalate an event with just a few clicks.
