

SANDESH GANDEWAR

+91- 7396648580

sandesh.gandewar@gmail.com

An energetic IT professional, targeting assignments as **Big Data Engineer** with an organization of repute (Industry Preference: IT)

CORE COMPETENCIES

Data Mining
Data Cleansing
Big Data Queries
Implementation
Quantitative Analysis
Data Regression Analyses
Performance Tuning
High Optimization

SOFT SKILLS

Analytical
Communication
Numerical Competence
Accuracy
Problem-Solving
Multi-tasking

TECHNICAL SKILLS

Library: PySpark, Spark with Scala
Language: SQL, Scala, Python
Software: Hive, Hadoop, Spark,
Other Tools: Azure Cloud ADLS, Airflow

EDUCATION

M.C.A. from Swami Ramanand Teerth Marathawada University in 2018
B.C.A. from Swami Ramanand Teerth Marathawada University in 2015

PERSONAL DETAILS

Date of Birth: 2nd June 1993
Address: Hyderabad, A.P.
Languages Known: Marathi, Hindi & English

PROFILE SUMMARY

- Big Data Engineer offering **nearly 4 years of rich experience in Analysis, Design, Coding, Testing, Implementation and working with Apache Hadoop Eco-components**
- **Participating in extensive analysis activities**, assistance in troubleshooting architectural problems, and provision of technical solutions to meet business requirements
- **Experienced with major Hadoop Ecosystem components** such as HDFS, Hive, Airflow, SQL, PySpark, Scala, and Azure Cloud Technology
- **Undertaking analysis and assessment of large volumes** of customer data using data mining tools to determine customer behavior & trends
- **Creating innovative solutions** to meet our company's technical needs
- **Exposure in converting data points into insights and reports**, effectively communicate analysis and results to business stakeholders
- **Devising optimum ways and methods to improve the data** hygiene and quality by cleaning up of junk data standardizing & validating data, floating out data into relevant fields
- **Gained knowledge of communicating data** findings to key stakeholders to help the organization meet business challenges
- **Exceptional organizational, analytical, and problem-solving skills**, with strong communication skills and adaptability to work independently as well as in project teams

WORK EXPERIENCE

Since Oct'22 with Nextogen, Hyderabad

Big Data Engineer

Technologies: PySpark with Python, Azure ADF, Azure ADLS, Hive

Project Description:

- Undertaking seals data and digital data from the Nike Store as part of the Planning Data Foundation project
- These data are being transformed to separate them into clean formats and are used as a source by numerous teams

Responsibilities:

- Involved in gathering the requirements, designing, development and testing
- Performed Data analysis on Azure ADLS data, reading through spark data frames
- Applying the transformations on CSV, Parquet and JSON files

Apr'21 – Oct'22 with Legato, Hyderabad

Big Data Engineer

Technologies: PySpark with Python, SQL, Hive, HDFS

Project Description:

- The SPFI and Command Center projects have several layers, and for each layer, must apply business rules
- The Mainframe is the data source, and data will be delivered to ADLS in ORC file format

Responsibilities:

- Developed PySpark scripts and Python functions that involve performing transformations and actions on data sets.
- Experience in working with Spark SQL for processing data in the Hive tables
- Experience with ETL and Query big data tools using NiFi

Aug'20 – Feb'21 with Cognizant, Hyderabad

Spark Developer (CILL Walmart USA)

Technologies: Spark with Scala, SQL, Hive, HDFS, SQOOP

Project Description:

- Managing the USD currency conversion
- Considering that sales data is entering CILL and being converted to the local currency

Jun'19 – Aug'20 with Infinite, Hyderabad

Hadoop Developer (CERS Verizon, USA)

Technologies: SQL, Hive, HDFS

Project Description:

- The decision to share one's private data with merchants is left up to the user

Roles:

- **Gathering requirements for designing, developing, and testing**
- **Preparing data patch for production concerns** via tactical fix and offer recommendations to enhance the quality of data consumed by downstream
- **Identifying, analyzing, and resolving infrastructure vulnerabilities** and application deployment issues
- Regularly **reviewing existing systems** and making recommendations for improvements
- **Interacting with clients**, providing **cloud support, and making recommendations** based on client needs
- **Finalizing the scope of the system** and delivering Big Data solutions
- **Collaborating with the Software Research and Development Teams**
- **Conceptualizing and generating infrastructure** that allows big data to be accessed and analyzed
- **Reformulating existing frameworks** to optimize their functioning
- **Ensuring that work remains backed up** and readily accessible to relevant coworkers
- **Remaining up-to-date with industry standards** and technological advancements that will improve the quality of outputs
