More than 3 Years of experience as Software Engineer, now seeking a challenging position to utilize my skills and abilities that offers Professional & Organizational growth, while being resourceful and innovative. I work primarily in the Insurance and Financial domain. Have expertise in preparing and preprocessing data, deriving useful insights from data, developing and deploying highly scalable machine learning models.

Experience –

- Having 6 months of experience as Software Engineer in IQZ Systems from Sep 2022 to Mar 2023
- Having 1.9 years of experience as Python Developer at RedHat.
- 6 months of Internship experience.

Professional Synopsis-

- ❖ Good in exposing and consuming APIs, RESTAPI, Web Services
- ❖ Sound Knowledge in AI and Machine Learning & DSA (Data Structures & Algorithms).
- ❖ Proficient in Core Python and its libraries and Modeling - regression, classification, linear etc.
- ❖ Proficient in building highly scalable and optimized engines for Data Analytics.
- ❖ Strong exposure in RDBMS (MySQL, MongoDB, Document DB, MSSQL) and Servers

Data Science, Python & ML -

- Data mining algorithm experience in the families of predictive algorithms (Regression, KNN, **Decision Trees**) and clustering algorithms (**k-means clustering**).
- Ability to process **Text Processing using NLTK library** and other Natural Language
- Thorough understanding of **Probability** and **Statistics**, **Bayesian** methods, **Time Series** analysis.
- Strong Python Programming skills using OOPS, Functions, Modularization & decorators.
- Sound Knowledge of Python's **Data Analysis** and **Machine Learning Libraries**.
- Development of REST APIs in Python. Experience in Web Framework **Flask**.
- Implementation of **regularization** techniques like **Lasso** and **Ridge in regression**.
- Source code management and Version Control system using **Git** and **GitHub**.

Strengths-

- Strong Programming skills.
- Experience in data management tools - **Relational and SQL databases**.
- Knowledge of Python's **Data Analysis** and **Machine Learning Libraries**.
- Ability to achieve in-depth understanding of the problem domain and available data assets.
- Able to investigate **Data Visualization** and summarization techniques conveying key findings.
- Ability to write a clean and production code with **Object Oriented Programming in Python**.

Education -

- BE (IT) | Sanjivani College of Engineering, Kopargaon | 2017-2020 | 69%
- DIPLOMA (Computer Technology) | K.B.P. Polytechnic, Kopargaon | 2017 | 68%

Projects Handled-

Project	POL Power Builder Report Migration.
Domain	Insurance
Description	<i>Find all the information that can help you to migrate from Power Builder for license choice, license renewal and Vehicle Insurance. Migrate code from PowerBuilder to Python.</i>
Roles and Responsibilities	• To work on report generation on jasper report. • To Develop the code for Power Builder to Python. • To create a dataset for Report migration. • To create a JRXML template and called template through python. • To Generate a PDF in python.
Project	Loan Default Prediction
Domain	Finance
Description	<i>A pioneer in digital banking, innovative financial products and services with the highest level of security. Our powerful web-based platform gives you streaming real- time data and one-click loan will default or not of the same essential capabilities featured in desktop software.</i>
Roles and Responsibilities	• To work on Data gathering and Data mining- Enhancing data collection procedures to get relevant information to build analytic system. • To carryout preprocessing, cleansing of data and to verify integrity of data. • To visualize and analyze data with data visualization with various python libraries to get insights of available data. • To develop appropriate machine learning model using various algorithms so it can satisfy the requirements with better efficiency.
