H.no: 4-9-626, Vinayakanagar Colony, Hayatnagar, Ranga Reddy - 501505

OBJECTIVE

To work with breakthrough ideas/technologies and build quality products for a multitude of customers.

PROFESSIONAL EXPERIENCE

GEP, Hyderabad, India

July 2019 – Present

Senior Software Engineer

- Worked cross functionally with various dependency teams to plan timelines and assist in feature development
- Mentored new joiners and aided in their understanding of the GEP products and helped them in learning required technologies
- Technical design and development of upcoming products using Object Oriented Programming concepts and Design Patterns
- Played an active role in operational aspect of hiring talent by conducting round 1 interview
- Worked on POC related to reading CAD to predict cost, migrating SQL code to c# and common computation framework for group of teams

Software Engineer

- Worked in different teams of GEP NEXXE™ in delivering complex use cases; also worked on performance optimization of SQL queries
- Closely interacted with the project management group to understand client requirements and further discussed technical approaches and challenges with team leads
- Upskilled with Selenium Automation, Unit Testing while working with Quality and Automation team to decide on test cases
- Created extensive documentation and videos for product hosting and on-boarding to have a one stop library to refer back to

Associate Software Engineer

- Worked in delivering a key cost-based module within GEP NEXXE™ (supply chain product) offering; team was awarded 'Best Team' for successfully delivering the module
- Developed features from end to end using SQL, C# in the backend and Angular in the front end
- Migrated all the standard components used in GEP from Angular 5 components to Angular 8

JHUB, Hyderabad, India

July 2018 – July 2019

Web Developer Intern

- Worked from ideation to platform launch along with the founding team of J-Hub, alumni and university authorities to develop an elaborate portal to connect industry to academia; developed and integrated features such as event and employment listing directory
- Portal was built with security features such as google captcha, email verification to avoid spam attacks using php and MySQL

TECHNICAL SKILLS

- Frontend: Angular, JavaScript, HTML, CSS
- Backend: .NET core API, C#, SQL, Elastic Search, Azure Function App
- Worked in Build Releases using Azure VSTS, Octopus and Github
- Testing and maintenance using NewRelic, Azure and Sonar Cloud
- Debugging and understanding of existing code

EDUCATION

JNTUH College of Engineering, Hyderabad, India 2014-2019

BTech and MTech (IDP) Computer Science and Engineering, 78%, First class with distinction

Narayana Junior College, Hyderabad, India 2012-2014

Intermediate, 96%, First class with distinction

Bhashyam High School, Hyderabad, India 2011-2012

SSC, 9.5 GPA

PROJECTS

- *Facial Emotion Recognition* - developed using Gabor filter & LBP for feature extraction and k-NN & Random Forest Classification techniques
- *Automated Student Attendance System using facial recognition* - developed using python and LBPH algorithm
- Android app to generate PDF of scanned papers from input Video - developed using Open Computer Vision

ACHIEVEMENTS

GEP Value Award for Q4-2020 - Awarded for ownership of the product

Smart Rice Hackathon 2019 - Winner State level hackathon conducted by IIRR (Indian institute of Rice Research). Developed an android app to predict the disease of a crop based on the picture uploaded.

Prediction was done by the classifier developed using python and TensorFlow
