

Sujeet Wankhede

✉ Data Engineer ☎

wankhedesujeet03@gmail.com

9518916055

🧩 TECHNICAL SUMMARY

- Having Total **4.5 years** of IT experience and combined expertise using **SQL, Python, Hive, Pyspark and Azure Cloud Platform-Azure Databricks and Azure Data Factory and Delta Tables**.
- Led the design and development of a scalable Data Engineering solution on Azure, utilizing Azure Gen2 for data storage, Azure Databricks with Pyspark for data processing purposes, Azure Data Factory for ETL processes and Azure Synapse for data warehousing and Analysis.
- Hands-on experience in working with Blob Storage, Azure Gen2, Azure Data factory, Azure Data Bricks with Pyspark, Azure Delta lake and Azure HDInsight.
- Good Knowledge of Azure Synapse Analytics.
- Hands-on experience in creating Pipeline, linked services, Data sets in Azure Data Factory for ETL based on the client expectation.
- Experience in creating Triggers such as Event Based triggers, Storage Based Triggers and Thumbing Window Triger.
- Experience in Using Azure Key vault, secrete scope, certificate and Access control IAM.
- Developed orchestration of Spark jobs using Apache Airflow.
- Worked with different file formats such as Text files, CSV, JSON and parquet.
- Capable of processing large sets and high volume of structured and semi structured data.
- Good understanding of Hadoop architecture, HDFS, and Map Reduce concepts and YARN.
- Extensive experience in Data Cleaning and applying Transformations on data using Pyspark based on client requirements.
- Good knowledge of Normalization, Fact Tables and Dimension Tables, also dealing with OLAP and OLTP systems.
- knowledge of Python topics like Data Structures, list comprehensions, file handling, functions, decorators, generators, regular expressions and object-oriented programming (OOPs).
- Strong experience in Spark code to perform ETL.
- Experience with Spark RDD, Spark Data frames, Spark SQL.
- Ability to work independently and as part of a team & lead a team with the ability to manage time and resources to meet assigned deadlines.

🧰 PROFESSIONAL EXPERIENCE

Tech Celestial Innovations

LLP (Jan 2019 to Feb 2020)-Pune

Clover InfoTech Private Ltd

(March 2020 to July 2020)-Navi Mumbai

Media soft information

Technologies

working as an Azure Data Engineer

09/2020 – present
Pune, India

EDUCATION

Bachelor of Engineering

Completed B.E from Sinhgad Institute of Technology Lonavala in The Year 2017.

TECHNICAL SKILLS

- **Azure Cloud Services:** Blob Storage, Gen1storage, Gen 2 storage, Azure Data Factory, Azure Databricks, Azure Synapse, Azure SQL DB, Azure Active directory
- **Scheduling Tools:** Airflow
- **Version Control Software:** Git, GitHub
- **Programming Languages:** SQL, Python, Pyspark
- **Hadoop Ecosystem:** HDFS, Map Reduce, Hive, Spark
- **Databases:** Sql Server, Oracle, MySQL
- **Data Warehouse:** Azure Synapse, Hive
- **Tools & Software's:** PyCharm, VSCode, Jupyter.
- **OS:** Windows, Linux

PROJECTS

Project: Insurance

Client: Beazley

Description: Beazley is an (Uk) based Insurance company. The firm provides health and medical related insurance for the customers.

Role: Azure Data Engineer

Responsibilities:

- Collecting the business requirement and analysis of the source data.
- Utilized Azure Gen2 to store and manage large volumes of data and Mounted and unmounted azure Databricks for the transformations by using service principle, Azure Active Directory.
- Used Azure Data factory for the orchestration purpose on-premise to azure cloud.
- Created Pipeline, Linked Services, Data sets for connection between source and sink.
- Changing the existing business logic if required after validating the data between source and target.
- Created Notebook by writing Pyspark code to perform transformations as per business logic by using with Column, Aggregation, window Function on Databricks Interactive /All-purpose or Job Cluster.
- Developed Automation of common test cases (Null check, duplicate check,filling missing Values, Schema Validation) using Pyspark.
- Working with JIRA for project management.
- Utilized Azure Synapse Analytics for storing data and conducting data analysis.
- Data Structures: String, list, tuple, set, and dictionary for organize and maniple data.
- Python Exception Handling: Managing errors and exceptional conditions in code.

Project: Pharma**Client:** Getinge**Description:** Getinge is a Global Medical and Pharmaceutical Technology Company, founded in Sweden in 1904. The firm provides equipment and systems within healthcare and Works on Drug Discovery and Development.**Role:** Data Engineer**Responsibilities:**

- Involvement in the analysis of the project requirements.
- Design and develop scalable and efficient data processing pipelines using Pyspark Data Frame and SQL APIs.
- Ingest data from various sources, such as databases, APIs, logs, and files, into a distributed processing environment.
- Transform and cleanse raw data into usable formats for downstream consumption.
- Designed and developed Scripts of common test cases (Null check, duplicate check, filling missing Values, Schema Validation) using Pyspark.
- Perform complex data transformations, aggregations, and calculations using Pyspark transformation functions.
- Python Functions: Reusable blocks of code for specific tasks (lambda, user-defined, recursion).
- Developed Python utilities using Pyspark to connect the source and target systems for the data process.
- Responsible for pull, push and committing the code using GitHub.

Project: Retail**Client:** Wayfair**Description:** Wayfair is a Retail company and has headquarters in Boston. It is an American-commerce company based in Boston, that sells furniture and home goods online.**Role:** Hadoop developer**Responsibilities:**

- Involvement in analysis of the project requirement.
- Worked on sqoop for the data import and export purpose.
- Utilized HDFS and hive for storing and managing large volumes of data.
- Maintain and Managing hql script and shell script time to time changing frequency daily and monthly job.
- Used Hive for the data transformation and data warehousing purpose.
- Sorted extracted data in Oracle database for further querying and analysis.
- Involved in knowledge sharing activities with the team.
- Involved in daily meetings.
- Used Airflow for the scheduling
