

PROFILE SUMMARY

- A Dynamic Professional with 6 Years of experience in consulting, Data engineering, business intelligence, Data Analytics, Proficient in BI analytical tools to ensure optimization and building solution insights.
- Experienced in communicating with business/stakeholders in gathering requirements and preparing detailed documents followed by system designing and managing complex internal and external teams along with data analytics, data pipeline orchestrations and ad-hoc responsibilities.

ACADEMIC CREDENTIALS

- **PG in Computer Application (MCA)** | Bharti Vidyapeeth University | **CGPA 8.30 / 10** **2017**

KEY SKILLS

- **Key:** ETLs , Data Pipelines ,RDBMS, Reporting , Requirement analysis, Data Modelling
- Team Management, DB migration, Ownership
- **Visualization tools:** Tableau - certified
- **Databases:** MS SQL Server, Snowflake, Redshift
- **Others :** AWS S3, Athena, Python, Glue , Airflow, Azkaban, SAS, ETL -Pipelines(Inhouse), Dbt

WORK EXPERIENCE

Data Axle , Pune - Application Engineer (Analytics Engineer) – BI & Analytics **Oct 2021-Present**

Technologies Used:- Python, Redshift, Tableau, AWS S3, Snowflake ,Airflow, AWS Glue, Dbt, Tableau Cloud

- Being part of product analytics team, delivered multiple analytical solution to analyze the product and created tableau dashboards on customer behavior, retention rate, subscription rate, repeating customer rate, cancel ratio etc.. it helped business to see a bigger picture and making decisions.
- Involved in designing tables in relational database and migration of on-premise data to cloud -Redshift/Snowflake, creation of data pipeline using AWS Glue, DAG creation in Airflow using Python.
- Transformed snowflake tables using Dbt.
- Working with cross functional teams to identify modifications in applications that will impact business processes.
- Worked with industry presales teams, onshore partners, the core technology community teams and Business Reporting Groups.
- Performed exploratory data analysis for several data sources (MS SQL Server, Redshift , Snowflake)
- Working closely with onshore partners to understand and maintain focus on their analytical needs, including identifying critical metrics and KPIs, and deliver actionable insights to relevant decision-makers.
- Created and maintained rich interactive visualizations through data interpretation and analysis integrating various reporting components from multiple data sources.
- Involved in End to End projects development followed by SDLC/Agile, in data engineering workflows (CICD, testing, code reusability, monitoring & alerting)
- Decreased the Average Handle Times (AHT) of project by 50% by assisting management with resource planning, Project Plans.

ZS Associate (Collabera), Pune - Data Engineer **Nov 2020- Oct 2021**

Technologies Used: - AWS S3, Athena, Tableau, Redshift, Azkaban, Snowflake, In-house ETL Tool, Python

- Took complete ownership of ETL & Reporting architecture design (Relational model). Ownership of ETL jobs, Reports and deliverables.
- Worked on In-house ETL tools with Python to manipulate and load data in data warehouse.
- Created data warehouse for the client where data were coming from multiple sources.
- Prepared performance metrics document by comparing existing reports and developed Tableau reports in different environments.
- Supported QA, UAT and performance testing phases of development cycle.
- highlight the business needs and delivered accordingly.
- Engaged and participated in the discussion of Project Plan, BRD, Data modelling.

Deloitte India, Hyderabad-Audit Analytics Specialist Assistant**Sep 2019- Nov 2020****Technologies Used:- SAS, Tableau, In house ETLs, SQL Server**

- Risk assessment analysis for client's journal reports with trial balance
- Analyzing financial data flow and relationship including Data Quality Checks on client system
- Performed financial risk assessment and journal entry analytics including reconciliation between journal entry population with trial balance, reconciliation between systems to identify any loops in client financial system.
- Developing data quality dashboard using tableau to assess the progress and issues faced during the data validation, remediation based on the client requirements.
- Understanding & coordinating for client's needs/ enhancements, customizing the performance milestones accordingly and developing scripts in SAS to modify the client data into a format used in Deloitte proprietary Tools.
- Supporting Lead BA activities to create, maintain and report on the program end-to-end view, identify project and program risks, assess impact to business and provide input to any risk/issue mitigation Strategies
- Mining & analysing data from multiple sources to drive optimization & improvement and delivered data- driven solutions to business challenge.

Nvidia Graphics (Spectrum Consultant) India- Data Analyst**Sep 2017- Sep 2019****Technologies Used:- SQL Server, Salesforce, Tableau, Excel**

- Collaborated with US-based stakeholders and business owners to understand the business requirements and recommended the best analytical solution using Business Intelligence using Tableau
- Generated Python Flask forms to replace the Google Sheet and connected with database.
- Performed Query based analysis like- Ad-hoc Queries, Views as per business requirements.
- Created and developed dashboards in Tableau using data blending, filters, Hierarchies, Transformations, Calculated Fields.
- Engaged in creation of dashboards and reports on Tableau and scheduled on Tableau server; tracked all Salesforce accounts and the trends of the CPQ Orders for Sales Operation team.

ACCOLADES

-
- Kudos from Selective Client for delivering application with zero production defects in 60 days vs. budgeted 100 days.
 - Appreciation from multiple stakeholders (SALES/OPS/Fin) for helping them out in critical project timeframes.
-
